SUMMARY

Software Engineer with 3+ years of experience building and maintaining web applications and backend systems. Experienced in Python, Django, REST APIs, database management, system integration, and workflow automation, with additional experience in Rust, asynchronous processing, and event-driven systems. A collaborative and adaptable developer who values continuous learning, teamwork, and building reliable, maintainable software.

TECHNICAL SKILLS

- **Programming Languages:** Python, Rust, JavaScript, PHP, Java
- **Backend Development:** Django, FastAPI, Axum, REST APIs, API Integration
- **Frontend Development:** React.js, Next.js
- **Databases & Search:** PostgreSQL, MongoDB, DynamoDB, Redis, Elasticsearch
- **Messaging & Data Processing:** Apache Kafka, ETL Pipelines, Event-Driven Architecture, Asynchronous Processing
- **Tools & Environment:** Git, Docker, Linux, Postman, Cron, Windows Task Scheduler
- **Core Competencies:** Database Design, Query Optimization, Workflow Automation, Debugging, Agile/Scrum

PROFESSIONAL EXPERIENCE

Cloudstaff — Senior Software Engineer

Cebu City, Cebu | Jun 2025 – Mar 2026

- Developed and maintained an insurance management system using Django and Next.js.
- Automated insurance workflows to reduce manual processing.
- Integrated the NowCerts API to improve data exchange and synchronization between systems.
- Developed backend services and frontend features to support reliable application operations.

CyTech Development & Operations Inc. — Senior Web Developer

Cagayan de Oro, Misamis Oriental | Dec 2023 – Jun 2025

- Led full-stack development of Risk Management and Business Continuity Management applications, including Business Impact Analysis workflows.
- Developed features for risk assessment, case management, security monitoring, and operational planning.
- Optimized database queries and background processing to improve API response times.
- Built a customizable Kanban board for case management and collaborated with stakeholders to deliver client requirements.

CyTech Development & Operations Inc. — Junior Web Developer

Cagayan de Oro, Misamis Oriental | Feb 2023 – Dec 2023

- Developed and maintained a Security and Privacy Compliance Management web application.
- Built frontend and backend features for compliance data management and reporting workflows.
- Improved data organization and application functionality to support business requirements.

SELECTED PROJECTS

HookRelay — Webhook Delivery System

Personal Project | Django, PostgreSQL, Apache Kafka, Rust

GitHub: github.com/jbexnolimit/hookrelay

- Building a webhook delivery system that processes events and tracks delivery outcomes.
- Implementing asynchronous event processing using Kafka and a Rust worker.
- Developing delivery-attempt tracking, HTTP response monitoring, status updates, and retry workflows.
- Testing API endpoints and end-to-end delivery flows using Postman and a local HTTP receiver.

OrderRecon — Order and Payment Reconciliation API

Personal Project | Rust, Axum, MongoDB

GitHub: github.com/jbexnolimit/orderrecon

- Developing a REST API for managing orders, payment records, and reconciliation runs.
- Implementing data validation, duplicate detection, and reconciliation rules to identify payment discrepancies.
- Building discrepancy reporting and status tracking features.
- Adding automated tests and database indexes to improve reliability and query performance.

Gatekeeper — Authentication and Authorization API

Personal Project | Rust, Axum, PostgreSQL, SQLx

GitHub: github.com/jbexnolimit/gatekeeper

- Developing authentication and role-based access control (RBAC) features for managing users and permissions.
- Implementing password hashing, access and refresh tokens, and login rate limiting.
- Building role and permission management endpoints, database migrations, and health checks.
- Writing automated tests for authentication, access control, and API behavior.

NG-SIEM — Security Information and Event Management

CyTech Development & Operations Inc. | Apache Kafka, Rust, ETL, REST APIs

- Developed backend features for real-time security monitoring and event processing.
- Contributed to Kafka-based ETL pipelines to collect, transform, and store security logs.
- Developed REST API features for alert management, security event analysis, threat detection, and alert rule configuration.
- Supported event detection and alerting workflows to help identify and monitor security incidents.

EDUCATION

Bachelor of Science in Information Technology
PHINMA Cagayan de Oro College | Cagayan de Oro, Misamis Oriental
Graduated: January 2022
